## Work Experience

### Staff Android Engineer, *SiriusXM*

12/2022 – Present

- Lead Android development across Pandora and SiriusXM platforms, supporting mobile, Android Auto, Android Automotive OS (AAOS), and Wear OS experiences
- Contribute to modernization of the Pandora Android codebase, improving maintainability, scalability, and alignment with current Android standards
- Architect and implement modular features using Kotlin, Jetpack, and modern Android architecture patterns
- Develop and enhance core platform capabilities including billing systems, shared libraries, and internal tooling used across multiple Android surfaces
- Collaborate cross-functionally with product, backend, and design teams to deliver cohesive features across multiple device ecosystems

### Staff Android Engineer, *Walmart*

02/2020 – present | Brooklyn, United States

- Lead Android engineering efforts of Health application from scratch
- Introduced many features and made large scale architectural changes in the Customer Inhome application as we continue to expand to multiple stores and create new partnerships
- Architected, code reviewed, and wrote documentation

### Platform Engineer, *Props by YouNow*

07/2018 – 11/2019 | Manhattan, United States

Android Development  
iOS Development

Smart Contract Development

- Introduced and Integrated CI on Android platforms
- Upgraded and maintained iOS and Android open source SDKs.
- Wrote smart contracts including one that links Ethereum wallets -Integration and usage of cryptocurrency in Younow's video streaming application

### Android Engineer, *Viacom*

09/2014 – 07/2018 | Manhattan, United States

- Launched VH1 fireTV in 2 months, written fully in Kotlin and tested.
- Complete conversion of a legacy maven project to gradle when gradle became the new standard.
- Maintaining 7 apps with one codebase using flavors.
- Worked with engineers in multiple time zones and countries

## Projects

### Litecoin Foundation, *Open Source Android developer*

2017 – 2018

Provided code reviews and worked on modernizing the Loafwallet codebase with engineers across the world.

## Awards

### NYU Startup bootcamp accelerator, *NYU Entrepreneurship*

2019

My team of cofounders made top 15 of 500 teams to participate in the Startup bootcamp accelerator program at NYU.

## Founder & Product Experience

### Founder & Mobile Engineer - *Ramen NYC* 🌐,

*www.ramen-nyc.com*

2024 – Present | NYC, United States

- Built and launched a mobile-first ramen discovery and tracking platform using Flutter and Firebase
- Designed and implemented core features including visit tracking (passport), reviews, maps, and community content
- Developed a companion SEO-driven website generating ~15K+ monthly impressions
- Designed end-to-end user funnel (web → app → activation) and analyzed conversion drop-offs
- Created content systems and visuals using Canva to support organic growth and acquisition
- Organized community events and partnerships to drive real-world engagement and retention

### Founding Mobile Engineer (Contract) - *Headway Hair* 🌐

2024 – 2025 | NYC, United States

- Developed a personalized haircare platform featuring quizzes, routines, and tailored content
- Built scalable mobile architecture using Flutter, Firebase, and BLoC/Cubit state management
- Designed user flows focused on personalization and long-term engagement

## Skills

### Mobile Development

Kotlin, Java, Flutter, Android SDK, Jetpack, Dart

### Architecture

MVVM, Modularization, Repository Pattern, Scalable System Design, BLoC

### Backend & Data

Firebase (Firestore, Auth, Storage), REST APIs

### Tools & CI/CD

Git, Jenkins, Bitrise, CircleCI, Gradle, Actions

### Analytics & Growth

Funnel Analysis, App Conversion Optimization

### Design

Canva (marketing assets, product visuals)

## Education

### Full Stack Web Developer Nanodegree, *Udacity*

01/2017 – 07/2017

### Bachelor of Science in Computer Engineering,

*New Jersey Institute of Technology*

2009 – 2014
